DETAILS

Details

Failures, evidence, and per-test detail.

PASS

1.1.1.1

creates a user with only the required fields

1ms

tests/users.spec.ts › User Management API › POST /users — Create user › Happy path

REQ-USER-001

normal

P high

Description

email + name returns a new User; id is auto-assigned.

Precondition

Email is not yet registered.

PASS

1.1.1.1

creates multiple users in sequence

0ms

tests/users.spec.ts › User Management API › POST /users — Create user › Happy path

REQ-USER-003

normal

P medium

PASS

1.1.1.2

returns 409 when the email is already in use

0ms

tests/users.spec.ts › User Management API › POST /users — Create user › Edge cases

REQ-USER-002

edge

P high

Note

Duplicate detection is an exact match on the email field only.

SKIP

1.1.2

returns the user matching the given id

0ms

tests/users.spec.ts › User Management API › GET /users/:id — Get user

TODO

1.1.2

returns 404 when the id does not exist

0ms

tests/users.spec.ts › User Management API › GET /users/:id — Get user

PASS

1.2.1

signs in with valid credentials

0ms

tests/users.spec.ts › Authentication flow › POST /sessions — Sign in

REQ-AUTH-001

normal

P high

Description

Password is bcrypt-compared. On success, the response sets a session cookie.

FAIL 1.2.1 locks the account after 5 consecutive failures

3ms

tests/users.spec.ts › Authentication flow › POST /sessions — Sign in

REQ-AUTH-005

edge

P high

Precondition 5 consecutive failures from the same IP / account
